The Family and Consumer Sciences program is designed to prepare students for both post-secondary education and careers related to business in Family and Consumer Sciences. It equips students with the necessary knowledge, skills, attitudes, and behaviors to become responsible citizens, leaders, and manage the challenges of living and working in a diverse global society.

Apart from classroom and laboratory instruction, the program also includes participation in the Family Career and Community Leaders of America (FCCLA) organization, which provides a range of activities to enhance academic and technical competencies while developing communication and leadership skills.
